"We had a solid third quarter, as we originated a number of new, high-quality loans that returned our portfolio to quarter-over-quarter growth, while we saw the venture debt market begin to improve," said Robert D. Pomeroy, Jr., Chairman and Chief Executive Officer of Horizon. "Our net investment income for the quarter was just one cent below our distributions for the quarter, as we grew our portfolio with quality investments to ensure that our portfolio will generate net investment income to cover our distributions over time."

"We also further strengthened our balance sheet, raising over \$18 million through our ATM program in the quarter and, subsequent to the end of the quarter, completing a private \$20 million convertible notes offering, both of which provide us with additional capital to execute on additional originations," added Mr. Pomeroy. "Looking forward, we expect to grow our portfolio through high-quality investments, while we focus on maximizing the value of our existing investments."

Third Quarter 2024 Operating Results

Total investment income for the quarter ended September 30, 2024 was \$24.6 million, compared to \$29.1 million for the quarter ended September 30, 2023, primarily due to lower interest income on investments from the debt investment portfolio.

The Company's dollar-weighted annualized yield on average debt investments for the quarter ended September 30, 2024 and 2023 was 15.9% and 17.1%, respectively. The Company calculates the dollar-weighted annualized yield on average debt investments for any period measured as (1) total investment income (excluding dividend income) during the period divided by (2) the average of the fair value of debt investments outstanding on (a) the last day of the calendar month immediately preceding the first day of the period and (b) the last day of each calendar month during the period. The dollar-weighted annualized yield on average debt investments is higher than what investors will realize because it does not reflect expenses or any sales load paid by investors.

Total expenses for the quarter ended September 30, 2024 were \$12.4 million, compared to \$11.6 million for the quarter ended September 30, 2023. The increase was primarily due to a \$0.8 million increase in interest expense.

Net investment income for the quarter ended September 30, 2024 was \$11.8 million, or \$0.32 per share, compared to \$17.4 million, or \$0.53 per share, for the quarter ended September 30, 2023.

For the quarter ended September 30, 2024, net realized loss on investments was \$33.9 million, or \$0.93 per share, compared to net realized loss on investments of \$11.8 million, or \$0.36 per share, for the quarter ended September 30, 2023.

For the quarter ended September 30, 2024, net unrealized appreciation on investments was \$29.3 million, or \$0.80 per share, compared to net unrealized depreciation on investments of \$17.5 million, or \$0.54 per share, for the prior-year period.
